

Ethnic Cleansing, Genocide Gaza settlement plans

Displaced Palestinians line up at gunpoint in the ruins of Jabalia refugee camp

Ethnic cleansing and genocide are hidden in plain sight, as Israeli settlers plan to re-occupy Gaza. The US arms and funds Israel. Netanyahu bet on President Trump. The Labour gov't remains silent.

Northern Gaza is under Israeli military siege and non-stop attack. Over 1000 Palestinians have been killed in this small area since early October. Anyone in the street risks being shot by Israeli snipers or drones, even young children and those holding white flags.

A video, verified by *The Washington Post* (archive.is/pzAvS) shows a child on the ground pleading for help after being wounded by an airstrike; when a crowd gathers to help him, they are suddenly hit by another airstrike, killing one and wounding over 20.

Depraved Israeli attacks have slaughtered entire families, doctors, journalists. Starving Palestinians were told to walk south to the "humanitarian zone". Most refused. The zone has also been bombed. Nowhere is safe.

On 1 November, leaders of 15 United Nations and humanitarian organizations called on Israel to **"Stop the assault on Palestinians in Gaza and on those trying to help them..."** The situation unfolding in North Gaza is apocalyptic... Hospitals have been almost entirely cut off from supplies and have come under attack, killing patients, destroying vital equipment, and disrupting life-saving services. Health workers and patients have been taken into custody... Tents sheltering displaced families have been shelled, and people have been burned alive."

Foreign Secretary David Lammy says this is not "genocide". Minister Anneliese Dodds dodged a question from Blackburn Independent Adnan Hussein about "ethnic cleansing". No-one else even mentioned it. ▶
